

**EFRR 2021 CV**

**Frederike van Wijck**

Frederike van Wijck is a human movement scientist with a qualification in physiotherapy from The Netherlands, currently Professor of neurological rehabilitation at Glasgow Caledonian University in Scotland. Her research focuses on optimising functional recovery after stroke through physical activity, skill acquisition and behaviour change strategies. Frederike led the design of the Enhanced Upper Limb Therapy programme within the Robot-assisted Training for the Upper Limb after Stroke (RATULS) study. She is past-president of the European Forum for Research in Rehabilitation, president-elect of the Society for Research in Rehabilitation in the UK and founding member of the Scottish Stroke Allied Health Professions Forum.
